Snowflake | ServiceNow | Governance-Driven Innovation
Greater Delhi Area

Summary

I am a ServiceNow Portfolio & Change Lead with proven experience in driving enterprise-wide digital transformation across ITSM Pro, ITOM, ITAM, IRM, Vulnerability Management, and HRSD. With a strong foundation in Scaled Agile delivery, portfolio governance, and stakeholder alignment, I specialize in bridging business strategy with ServiceNow capabilities to deliver measurable outcomes.

Over the years, I've led cross-functional teams of developers, architects, and business analysts to design and implement scalable ServiceNow solutions that improve efficiency, strengthen risk controls, and enhance employee and customer experiences. My role extends beyond delivery — I focus on change management, adoption strategies, and continuous improvement to ensure platforms generate lasting business value.

Experience

Fidelity International

15 years 7 months

Senior Project Manager

March 2022 - Present (4 years 4 months)

Gurugram, Haryana, India

Leading ServiceNow platform adoption and transformation. Serve as the focal point for communications and coordination with the sponsor executives and internal stakeholders.

Define and track Key Performance Indicators and actively manage Cost.

Leading a team of project managers and ensure on-going control of the project (Kick-off meeting, overall Project Management Approach, Communication Plan, Risk Management, Issues Management, Change Control)

Infrastructure Project Manager

December 2015 - April 2022 (6 years 5 months)

Gurgaon, India

Ensure predictable consistent and successful project delivery. Plan, coordinate, and monitor larger scale scope and budget projects with a high degree of complexity and risk. Partner with key business stakeholders to ensure a successful start-up and completion of a project.

Projects span multiple business units or functional areas. Completed implementation of Denodo Docker containers, Full Stack Engineering, Delphix, Tableau with Agile transformation changes.

Delivered multiple strategic projects for the UK retirement business. Establish a team of Project managers in Dalian China during a 6 months stay in 2018.

Infrastructure Project Lead

April 2014 - December 2015 (1 year 9 months)

Gurgaon, India

Delivery Technology Infrastructure for Institutional business applications.

These include Servers: Wintel VMs Physical Servers, Linux Redhat VMs and Physical Servers, AIX LPARs. Databases: Oracle, SQL, Sybase. Middleware Components: Websphere Application Server. Network components: F5 Load balancing Storage

Assistant Bridge Leader (UK and India)

December 2010 - March 2014 (3 years 4 months)

Manage a cross skilled team that is split in two locations - India and UK. The team is involved in the following major activities: > Handling HP Openview alerts for servers database middleware and application for Fidelity. > Running and managing jobs through Control M and Autosys. > Running very critical jobs backend for Fidelity financial services on AS400 Servers. > Managing scheduled backups and media management on AS400 iSeries Servers. My role along with managing the team also involves the following critical tasks: > Incident Management for Major outages impacting Fidelity operations. > Driving improvement and automation initiatives in the team. > Handling HP Openview threshold monitoring.
